

# PRIYADHARSHINI G

MERN Stack Developer | Full Stack Development Enthusiast | Problem Solver

+91 84288 17940 | priyadharshinig354@gmail.com | linkedin.com/in/priyadharshini-gnanamuthu | github.com/priya302005

## CAREER OBJECTIVE

Computer Science Engineering student with strong foundations in Data Structures, Object-Oriented Programming, and Data Science. Skilled in Python, SQL, data analysis, and machine learning, with hands-on experience in full-stack web development using the MERN stack. Interested in building data-driven and scalable software solutions with clean and maintainable code.

## ACADEMIC QUALIFICATION

**B.E. Computer Science & Engineering** — National Engineering College, Kovilpatti | 2023 - 2027 | CGPA: 8.55

**HSC** — Municipal Girls Higher Secondary School, Tirunelveli-Town | 2023 | 87.5%

**SSLC** — Municipal Girls Higher Secondary School, Tirunelveli-Town | 2021 | All Pass

## SKILL SET

**Languages:** Java, Python (Data Engineering), C++

**Web Development:** HTML, CSS, Node.js, REST API

**Databases:** MongoDB, SQL

**Data Science & Analytics:** Data Analysis, Machine Learning, Power BI, Data Visualization

**Core CS:** OOP, DBMS, SQL, CCS

**Tools & Testing:** Git, GitHub, Streamlit

## PROJECTS

**Restaurant Management & Recommendation System** — MERN Stack

- Built a full-stack platform for discovery, ordering, and personalized recommendations, spanning 10+ RESTful API endpoints and 6+ scalable MongoDB collections.
- Implemented OOP-based authentication and order management across 4 core modules (auth, wishlist, order history, one-click reorder), validated through 20+ API test cases.

**Career Guidance Platform for Tamil Nadu Students** — MERN Stack (In Progress)

- Developing a scalable platform covering 3 academic pathways (diploma, degree, government exams), with role-based authentication and an admin dashboard managing 10+ content modules.
- Designing the information architecture and UI flows across 8+ screens to guide students toward the right academic and career pathway based on their profile.

**Geospatial-Based Optimized Business Strategy for the Vessel Industry** — Python, Machine Learning, Geospatial Analytics

- Built a geospatial analytics system to identify profitable vessel-business expansion locations by analyzing revenue, demand, customer density, and regional performance data.
- Applied clustering across 50+ regions to group areas by business potential and computed a recommendation score to rank each as a high, medium, or low opportunity zone for investment.
- Designed 4 visualization types (bubble demand maps, radar charts, Sankey diagrams, cluster maps) to help stakeholders interpret regional patterns and prioritize expansion decisions.

## INTERNSHIP

**UX/UI Design Intern** — Exio Entertainments (Apr 2025 - Aug 2025)

- Designed 15+ responsive UI screens and wireframes across 3 product modules, ensuring accessibility and UX best practices; collaborated with a 5-member development team to bridge design and engineering.

## ACHIEVEMENTS

- Solved 2,000+ problems on SkillRack (algorithmic proficiency) and 150+ on LeetCode (DSA & code optimization).

## CERTIFICATIONS

- Responsive Web Design — FreeCodeCamp
- Business Analytics Basics — Simplilearn
- Introduction to Responsible AI — Simplilearn
- DBMS Course —Scaler

## PERSONALITY TRAITS & LANGUAGES

**Personality Traits:** Quick Learner, Self-Motivated, Team Player

**Languages Known:** Tamil (Native), English (Proficient)
